## RADIO INTERFERENCE TO BE INVESTIGATED

A complaint has been made to the Union Power Company about the interference on radios about town, due to their power lines, and it is expected that a man will be up from Drumheller this week and he will endeavor to locate the cause. This will be a great help to some radio users, who, in the past, have not been able to successfully operate their radios on account of the continuous interference.

## BADMINTON CLUB FORMED IN CARBON

A meeting was held in the Elks hall Carbon on Monday evening for the purpose of discussing the formation of a Badminton Club. It was decided to form a club to be known as the Carbon Badminton Club. The fees were set at \$3.00 for adults and \$1.50 for High School students for the season. It was decided to rent the Elks hall for four nights per week and afterwards for the purpose of playing Badminton.

The following officers were elected: Honorary President, Rev. Batchelor. President, J. A. MacDonald. Vice-President, E. Sellens. Secretary Treasurer, W. A. Braisher. Executive Committee; the President, vice-president, secretary, and W. Edwards, Mrs. Willson and Miss K. Ramsay.

For the present racquets and "birds" will be loaned to members, and it is expected to start play on or about December 1st.

## GOLFERS ARE FUNNY

When they drive they walk. However carefully they address the ball they are more or less surprised if it goes where they want it. They leave the tee and go off with the caddy.

If they top the ball its the opposite to a 'topping' shot.

Truth may appeal to them but they prefer a good lie.

They can halve a hole and still leave it whole.

They join a club and then provide others of their own.

They finish a round all-square.

The player who goes down in one is likely to be one up. G.F.A.

## NON-ADVERTISERS PAY FOR COMPETITOR'S ADVERTISING

In a certain town there was a merchant by the name of Hank Snarl, stated the Lewisburg Journal, in a little story on advertising. As the years went by Hank's business dropped gradually away.

One day there came to Hank's town a young man who obtained a position as ad solicitor for the local newspaper. The old editor told the young man not to waste his time with Hank, but the young man was undaunted, and finally persuaded Hank to put on a sale of men's suits.

It was first ascertained that Hank usually sold 100 suits a year; that these suits cost \$15 and retailed for thirty.

By the agreement with Hank, the ad. man agreed to prepare all the ad-

## UNION POWER COMPANY PROPOSE NEW LIGHT RATES

### ELECTION OF OFFICERS AT ELKS MEETING ON THURSDAY

The regular meeting of the Carbon Elks Lodge will be held Thursday evening, December 4th, when election of officers for the coming year will take place. As this is the most important meeting of the year a full attendance of all members is earnestly requested.

### "HONEYMOON FLATS" AT CARBON THEATRE THIS WEEK

An intimate, sophisticated revelation of newly-married life is contained in Universal's clever comedy, "Honeymoon Flats," which will show at the Carbon Theatre on Friday and Saturday of this week, with George Lewis and Dorothy Gulliver co-starring.

The story is well-directed, smooth and progresses evenly under increasing suspense to the very last scene. It is all about the young Claytons, the girl of a daughter of wealthy parents and the boy a struggling young college graduate who insists that he support his wife on his own salary despite his mother-in-law's patronizing attitude.

It also concerns a friend who is married, both he and his wife having their private love affairs. These are worked into the story neatly. The picture is revealing and interesting, especially to all people who still consider marriage a romance and even to those who don't but did at least during the first year.

"Honeymoon Flats" permits them to peek behind the boudoir curtains into the life of a young couple, who are more or less baffled and bewildered by their new status. Their quarrels are humorous and the "in-laws," butting in on everything, add much to the hilarity of this intensely human comedy of affairs.

### DO-X FLIGHT IS ABANDONED

Herr Traumann, representative of the Dornier Company in Spain, said last Friday that the seaplane DO-X had abandoned its proposed flight to the United States this winter and that the plane would be held for the remainder of the year at Ferrol, near Cobunna, Spain.

### ANGLICAN CHURCH SERVICES

Sunday, November 30th  
Evansong and Sermon ..... 7.30 p.m.  
Preceded by congregational choir practice at 7 p.m.

REV. L. D. BATCHELOR,  
Priest in Charge

copy and conducted the sale.

For the sale the suits were reduced to twenty-two fifty. Three hundred suits were sold. Two hundred and fifty dollars was the amount paid for advertising. Hank made a profit of \$2,000.00

Who paid for the advertising?

Certainly not Hank, for he sold far more suits during the sale than he would ordinarily have sold during the entire year. He made a profit of \$2000 of \$500 more than his usual annual profit on 100 suits.

The people who bought the suits did not pay the bill for in ordinary circumstances they would have paid \$30 each for the suits, and they actually saved money.

It is clear that the young man who put on the sale was not out of pocket.

Who, then, actually paid for this advertising? Why, of course, the bill was paid by the merchants whose suits remained on their shelves, because Hank beat them to their regular customers.

Mr. Merchant, if you are not advertising at the present time, now is the time to start, whether it is newspaper or poster advertising. Then the merchant who don't advertise will pay your advertising. A word to the wise merchant is sufficient, and the wise merchant will be the man who advertises, not spasmodically, but regularly.

Christmas Cards for the Old Country must be mailed by December 1st.

A representative of the Union Power Company of Drumheller met the Village Council on Monday night of this week to discuss the change in the power rate in Carbon. In the past the citizens have been paying 13c per Kilowatt hour for light, but under the proposed change this rate will be reduced to 8c and a service charge of 75c per month extra will be made.

The following is the schedule of new rates affecting householders:

**Light rate:** For the first 25 kilowatt hours the charge will be at the rate of 8 cents. For the next 25 kilowatt hours the rate will be 6 cents, and all additional power used will be at the rate of 4 cents per kilowatt hour. To these rates will be added the 75 cent service charge each month.

**Combination Rate:** (for lighting, radios, heating, etc.) Service charge \$1.50 per month. For the first 25 kilowatt hours the rate will be 6 cents and for all additional power used the rate will be at 3 cents per kilowatt hour. The minimum on this rate will be \$3.00 a month instead of the minimum of \$1.25 as on the ordinary lighting rates.

The Village Council is considering this change in rates and it is expected that they will adopt them in place of the rates now existing. Should the council adopt these rates now they will go into effect immediately.

It is stated that this new rate will reduce the light account of practically every consumer in Carbon, and those who use over 25 kilowatt hours per month will affect quite a saving over a years time.

## NEW COAL COMPANY TO OPERATE HERE ON LARGE SCALE

Just when things seem to look the blackest something always turns up and with these hard times comes the announcement of a new coal company for Carbon. The following is a report of this company, the facts which are authentic, having been published by The Financial Post, and we present them to our readers. Just when the new company will start operation is not ascertained, but no doubt it will be within the next twelve months.

This new company is to be known as "The Alberta Carbon Coal Co., Ltd." and is incorporated under the laws of Alberta, with Head Office at Edmonton Alberta. The Registrars and Transfer Agents are The Imperial Trusts Co. of Canada, Toronto. The auditor is H. O. Patriquin, Edmonton, Alberta.

The Company holds a ten year contract for its entire output up to 500,000 tons per annum. The coal will be marketed under the registered name of "Alcarco Coal."

This company owns leases on 5,160 acres at Carbon, Alberta. The C.P.R. runs through the property and the Company reports that said property is underlaid by seams of sub-bituminous coal, approximately 4 feet thick, the upper seam of which is estimated to contain 19,000 tons.

The Alberta Carbon Coal Company plans a complete mining plant with 1,000 tons per day.

Officers and Directors of the Company are: W. P. Hinton, president, Ottawa; Col. George B. McLeod, vice-president; Herbert Cameron, Secretary; J. R. Patterson, Treasurer and managing director; P. W. Abbott, Edmonton.

The above Company is capitalized at 2000 Preferred shares of a par value of \$100.00 per share and 70,000 common shares at \$10.00 per share, all to be outstanding. The Preferred stock will bear interest at 7 per cent per annum, cumulative, and the interest payable half-yearly. Stock will be redeemable at 105 up to and including 1933, less 1 per cent each year thereafter to 1940, afterwards at par.

In March, 1930, \$200,000 preferred shares and 16,000 common shares were offered by Litter and Glover, Commonwealth Building, Ottawa, in units of

## OLIVER PIMM INJURED IN MINE AT DRUMHELLER

Word was received last week that Oliver Pimm, a local lad, was seriously injured in a mine accident at Drumheller. The first report was that his back and one hip were broken. However a later report was to the effect that both hips were broken as a result of a cave-in, but his spinal cord was not injured. Oliver is receiving medical care in the Drumheller hospital, and it will probably be many months before he is able to be around again.

## DEBATING CONTEST FOR M'DONALD CUP

The first Debating Contest for the MacDonald Debating Trophy will be held in the Elks Hall, Carbon, on Friday evening, December 5th, when Carbon and Acme High schools will be the contenders. The subject of the debate will be "Resolved if a boy has a secondary school education, two years of properly supervised foreign travel would do as much to fit him for life as a college education." Carbon will take the affirmative, the speakers being Annie MacDonald, Jack Code and Billy Peters. A short musical program will be given and all are cordially invited to attend. There will be no admission charge but a collection will be taken to defray expenses.

The Carbon branch of the Bank of Montreal has on hand a limited number of the following booklets, and the farmers of the district who are interested may obtain one by applying to the manager.

"Diversified farming is safe farming." "Hogs for pork and profit." "The Cow, the mother of prosperity." "Making the garden pay." "Sheep for mutton, wool and money." "Home Canning booklet."

1 preferred and 8 common shares at \$200 per unit.

## HOCKEY CLUB IS RE-ORGANIZED

A meeting of all those interested in Hockey in Carbon this year, was held in the Municipal office on Friday of last week. A few of the citizens interested in the game were present and from these the officers were elected as follows:

Honorary-president, S. J. Garrett. President, G. F. McGregor. Vice-President, Geo. Trepanier. Sec.-Treas., Bruce Ramsay. Executive Committee: Jack Spence, Stan Carney and E. J. Rouleau.

The first business to contend with was the possibility of obtaining the skating rink this year and to operate it on schedule. The Executive committee was appointed to interview the Village council regarding this and since then the Council has given their approval to the hockey club to operate the rink.

It was decided that the fees this year would, of necessity, be the same as last year, i.e. Family Ticket \$5; Gentlemen \$3; Ladies \$2 and public school children \$1. Single admissions, adults 25c and children 10c.

At this meeting it was decided that should the Hockey Club operate the rink that they would hire a caretaker for what he could make out of it, and the members of the club would do all they could to assist in the initial flooding, etc. The rink will be operated through the entire season and skaters will be assured of a full season's sport if they purchase a season ticket.

On Sunday a number of the more energetic members of the Hockey Club went down to the rink and cleared the grounds and done other work in order to get the rink in shape for flooding. With a little cold weather ice making will be underway.

A local league will be formed in Carbon this year with three, and possibly four, teams, so that everyone interested will be able to enjoy the sport. A local intermediate team will also be formed and some interesting outside games for the fans ought to be the result.

My girl and I just kissed and made up.  
Judging from your appearance one would think she made up first.

## Unemployment Relief Policies

Unemployment not only casts a sinister shadow over the world today, but the substance of the thing has hundreds of thousands, even millions, of men, women and children in its grip. Admittedly the situation is a serious one, first, because of the actual suffering entailed thereby, but also because it is causing men to "see red," as the saying is, and lose faith in all established and orderly methods of government, society and business. The tendency is to repudiate economic truths, and to try experiments with almost any hair-brained proposal that may be advanced. Here lies the real danger for the future, because many of the suggested remedies would result in a state of affairs far worse, and cause more suffering, than the condition they sought to improve and cure.

One suggested temporary remedy for present unemployment that undoubtedly finds support in many quarters is the substitution of handwork, manual labor, for machinery in prosecuting relief works. For example, it is reported that one large United States city is developing a program of winter work that will substitute pick-and-shovel brigades for machines, the object being, of course, to give work to a larger number of men. The same suggestion is being advanced in connection with municipal relief works throughout Canada.

The question is: Should we deliberately abandon our labor-saving devices and revert to the painfully slow methods of yesterday in order to provide jobs for the unemployed? Is it wise to do so, and, in the long run, are the unemployed benefited thereby? The subject deserves close study.

Without doubt, a good deal of work can be manufactured by substituting primitive manual methods for more efficient machine-processes, remarks the New York Journal of Commerce. Indeed, by some systematic elimination of our modern labor-saving devices, it goes on, we could speedily reduce any modern industrialized community to a condition which would require the full-time effort of every able-bodied person to prevent wholesale starvation and death from exposure. But, without carrying the policy to any such lengths, is the suggestion good in any way?

In one of our prairie provinces where much road work is being carried on as a means of providing employment, decision was reached to build a certain road without use of machinery and solely by horses and manual labor. Objection was raised by some people that by using machinery for certain phases of the work, a greater mileage of good road could be constructed for the same money while giving employment to just as many men because of the greater mileage involved. This view was rejected, no machinery was used, and the work proceeded. A total of five miles of graded road was the result. Now it is realized that with the same number of men given work, practically the same expenditure of money, and the use of a certain amount of machinery, three times that mileage could have been constructed. The farmers of the district who were given relief work on that road would have benefited more from fifteen rather than five miles of good road, while in the years to come they must pay their share of the taxation necessitated by the relief expenditure. They gained nothing temporarily, and will lose in the long run.

Fifty men digging a trench for a sewer or other pipe line with pick and shovel will accomplish just so much in a day, but the same fifty men working in conjunction with a trench-digging machine will accomplish several times as much, and with little more expense. Or fifty men cleaning snow off sidewalks with shovels will only do a fraction of the work that the same fifty men following after snow-ploughs will do, yet the same number of men will be given work and practically the same expenditure of public funds be required.

There should be no hasty assumption that the elimination of machinery in carrying out unemployment relief works is wise, or that more work for the unemployed can be thus provided. It does mean, however, that less will be accomplished for the money expended, and for this economic loss everybody, including those at present unemployed, will have to pay through taxation in the years to come.

Other suggested remedies have more to commend them, as, for example, the proposals in Great Britain and Germany to raise the compulsory school attendance age by one year, thus keeping some hundreds of thousands of children in school for a longer period instead of having them forced into employment replacing others now at work, or merely added to the ranks of the idle and out-of-works. There is something constructive in such a policy, benefiting the coming generation of workers, and raising the whole educational standard of the nation.

So, too, is there much to be said in favor of the suggestion that the present six-day or five and a half-day work week be reduced to a five-day work week, or that the present 8-hour day be reduced to a 7-hour or even a 6-hour day. As the head of one of the greatest industrial corporations in the world today recently pointed out, the greater the amount of leisure time enjoyed by the workers of the world, the larger will be their demand for the things necessary to the enjoyment of those leisure hours, thus creating a greater demand than ever for the production of the things they require. Thus would more men be employed, more goods produced and purchased, a higher, rather than a lower, standard of living created.

## Not Good Publicity

Stunt Flying Does Not Help Aviation  
In Any Way

In the Preakness, N.J., airport on a recent Sunday, 5,000 people were watching the marvels of skill in flight when an airplane driven by veteran Alden H. Russell, went into a tail spin and crashed, injuring Russell seriously and his one passenger fatally. More than these two men were endangered; the crash came within 300 feet of the massed spectators. In Toronto at about the same time a pilot and two women passengers were burned to death in a low crash after stunting.

The friends of commercial aviation in view of the number of such fatalities, may well ask themselves what kind of publicity will most benefit their young industry; the plaudits of the crowd gathered to risk their own lives in seeing reckless pilots risk theirs, or the story of the really remarkable advance that is being made in aviation with a purpose. For, almost unnoticed along with all this dangerous stunting the carrying of air mails and passengers goes on with comparative safety, which should be if attention were not constantly diverted from it by fatal accidents in exhibitions, most encouraging.

It ought not to take a major accident with a hundred people killed by a 'plane out of control to open the eyes of aviation authorities to the necessity of curbing the practice of recklessly showing off what wonderful things can be done in the air—with luck, which does not always attend the venture.

## Guard the Baby Against Colds

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy and good-natured. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Canada and Empire Reforestation

Canada is yearly playing a bigger part in Empire reforestation. Fifty-three per cent. of the tree seed exported has gone to Great Britain, forty per cent. to New Zealand, and the remainder to Australia, Ireland, and other parts of the Empire. During the past ten years the British Forestry Commission has planted 140,000 acres of softwoods, the greater part of the seed used coming from Canada.

**Cause Of Asthma.** No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

## Western Canada Sugar Production

About 24,000,000 pounds of sugar will be produced this year from sugar beets grown in Southern Alberta. About 14,000 acres of beets were under crop this year. The centre of the industry is at Raymond.

**Requisite On the Farm**—Every farmer and stock raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

## Meat Consumption In Canada

The per capita consumption of meats in Canada last year was: beef, 676,900,352 pounds or 69.09 pounds per capita; pork, 798,638,774 pounds or 81.52 pounds per capita; mutton and lamb, 70,511,238 pounds or 7.20 pounds per capita.

More than 9,000 elephants work in Siam at the task of transporting logs from forest to river.

Banish pain with Minard's Liniment.

THE first pipeful tells the story better than a full page advertisement—

Here is a cool, fragrant smoke that lasts and lasts. All the smoothness and flavour of the finest tobaccos properly aged and carefully blended.

This new screw top tin is a wonder—it keeps the contents in perfect smoking condition; and when empty, can be put to many uses.

12 Pipefuls in each 3/4 lb. tin  
3 " " " 20c. package  
2 " " " 15c. package

You are already acquainted with the excellent qualities of the other members of the famous Turret family—Turret cigarettes, Turret fine cut for those who roll their own—and we now invite you to give this excellent TURRET PIPE TOBACCO a trial.

## New Railway Construction

C.P.R. To Commence Work At Once  
On Saskatchewan Branch Lines

Immediate work on a hundred miles of new rail construction in Saskatchewan is foreshadowed by D. C. Coleman, vice-president of western lines, Canadian Pacific Railway, in announcing the award of four grading contracts which form a portion of the company's advanced construction programme recently referred to by E. W. Beatty, K.C., chairman and president of the company. The contracts are for the completion of the line from Nipawin to Henribourg, 20 miles; Rosetown to Gunnworth, 20 miles; Medstead to Meadow Lake, 35 miles, and from Hamlin, northeastern, 25 miles.

"I wish you could pay a little attention to what I am saying," roared the exasperated barrister to a stubborn witness. "Well," was the reply, "I'm paying as little as I can."

## Drug Ring Smashed

United States Federal Agents Make  
Thirty Arrests

Thirty arrests in seven cities, and seizure of drugs valued at \$25,000, were reported by United States federal officers who for six weeks have worked under cover in an effort to smash what they described as an "international drug ring—one of the biggest and most powerful in the United States."

The secret government agents caused the arrests in Syracuse, Buffalo, N.Y., Utica, Albany, Troy and Schenectady. The coup was said to have been engineered by narcotic officials at Washington and New York.

Three were taken into custody in Syracuse Saturday night, Nov. 1, after undercover men, who had gained the confidence of several of the men, said by them to be members of the ring, were lured to Syracuse with invitations to a "wild party."

## Heart and Nerves So Bad

Was Unable To Sleep For Hours

Miss Theresa M. Ravary, Gallingtontown, Ont., writes:—"I was troubled, for almost a year, with my heart and nerves, especially on retiring at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

## Better Times Than Ever Loom Just Ahead If Experience Of History Can Be Relied Upon

A "cheer up" cry, with reasons for it, which are as applicable today as when they were written, appears in an article by Macaulay, contributed to "The Edinburgh Review" of January, 1830. He points out that in almost every part of the annals of mankind, the industry of individuals, struggling up against wars, taxes, famines, conflagrations, mischievous prohibitions, creates faster than governments can squander, and repairs whatever invaders can destroy.

The time in which the historian wrote was admittedly one of great distress, and he adds: "If we were to prophesy that in the year 1930 a population of 50,000,000, better fed, clad and lodged than the English of our time, will cover these islands—that cultivation, rich as that of a flower garden, will be carried up to the very tops of Ben Nevis and Helvellyn—that machines, constructed on principles yet undiscovered, will be in every house—that there will be no highways but railroads, no travelling but by steam—that our debt, vast as it seems to us, will appear to our great grandchildren a trifling encumbrance, which might easily be paid off in a year or two—many people would think us insane." Such a prophecy, if made, would have come remarkably close to the mark. The population of the British Isles is a little less than 50,000,000, but the people are undoubtedly better fed, clad, and lodged than they were a century ago, and the debt of those days would be considered a trifle now.

But the historian wisely disclaimed any intention to prophesy, and made his appeal to the general principles of history. To almost all men, he says, the state of things in which they have been used to live seems to be the necessary state of things, and though, in every age, everybody knows that up to his time progressive improvement has been taking place, nobody seems to reckon on any improvement during the next generation. It cannot be absolutely proved that those are in error who say that society has reached the turning point; that the best days have been seen; but so said all who came before us with just as much apparent reason. "On what principle is it that if we see nothing but improvement behind us, we are to expect nothing but deterioration before us?" Macaulay declares that rulers will best promote the improvement of the people by strictly confining themselves to their own legitimate duties by leaving capital to find its most lucrative course, commodities their fair price, industry and intelligence their natural reward, illness and folly their natural punishment, by maintaining peace, by defending property, by diminishing the price of law and by observing strict economy in every department of the state. "Let the government do this, the people will assuredly do the rest."

The situation today is not new. The world has periodically contended with similar or worse conditions and has emerged more progressive and prosperous than before. Macaulay's appeal to the history of mankind supplies reasons for confidence in the future.—Toronto Mail and Empire.

### Canada's Clay Resources

In addition to many other types of clays Canada has immense resources of clays and shales suitable for the manufacture of building brick, and structural and drain tiles.

"Why do you bother to paint pictures? There are any amount of them to be bought."—Der Whare Jakob, Berlin.

W. N. U. 1865

### A New Definition

Scotch Minister Upsets Idea Of What "Calgary" Means

The friendly controversy which for years has raged over the name of the city of Calgary is expected to break out afresh with the arrival from Scotland of a new Gaelic definition of the word "Calgary." For years it has been generally accepted that the Calgary meant "clear running water." Now comes word from Rev. Archibald Scott, D.D., of Helmsdale, Sutherland, Scotland, that the real definition is "Hut in the Thicket" or "Den of the Rough."—Calgary Herald.

### THE COWL NECKLINE TERMINATES IN SCARF

Here's a marvellous dress for Autumn for town wear. And best of all, it's a stunning dress for later that will easily slip under a Winter Coat.

The curved seaming reduces any bulk about the hips.

The bolero bodice is cut on very becoming lines. It is given an entirely new aspect through the cowl neckline that ends in a scarf at the back.

It is a tweed printed silk in rich dark brown tones with beige contrast in plain crepe.

Style No. 921 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

You can copy it at a big saving. Black canton crepe with white crepe is very chic and dignified or if preferred the cowl neckline may be made of self material.

Transparent velvet, crepe patterned or plain woolen, crepe satin and crepe marocain are delightful suggestions for this model.

Size 36 requires 3½ yards 54-inch with ¾ yard 39-inch contrasting. Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

## DEAN OF C.P.R. CONDUCTORS

Charles H. S. Henderson, train conductor operating on the Canadian Pacific Railway run between St. Stephen and Edmundston, N.B., lays claim to the distinction of having been the youngest train conductor on any railway and of being today the oldest of any in active service. In 1878, at the age of barely seventeen, he was conductor on the New Brunswick Railway between above points and he continued in the same capacity when it was taken over by the Canadian Pacific. Born in 1862, from the age of nine, when he lost his parents, he has been in continuous employment and since 1883 has had uninterrupted charge of regular scheduled trains with the exception of a short term as Train Master. He has had under his care at various times three presidents of the Canadian Pacific Railway—Sir W. C. Van Horne, who said of him, "You're some man, Henderson"—Baron Shaughnessy, who described him as "a very careful and efficient man"—and E. W. Beatty, of whose special train touring the Maritime Provinces last year he was conductor. Mr. Beatty congratulated him on his many years of service and introduced him to Sir Herbert Holt who told him he had the most wonderful record of the system. This year Mr. Henderson was conductor of the vice regal train carrying Lady Willington and suite from St. Edmundston to St. Andrews. As above illustration shows, he is still in full possession of the energy and vigor of a man many years younger.

### Development Of Dairying

The Manitoba Livestock Credit Association, in conjunction with the Winnipeg Board of Trade, is working on a scheme for the development of dairying and of increasing the production of poultry and eggs, and the rehabilitation of hogless farms.

## Canada's Greatest Opportunity Lies In Increasing The Production Of Livestock

At a time when the prices for grains and other farm products have been declining rapidly, livestock prices have shown outstanding strength. At present relative prices, says the monthly letter of the Royal Bank of Canada, it is decidedly more profitable for the farmer to export his grain in the form of cattle, cheese and bacon than to attempt to sell his grain in a world market burdened with surplus supplies from many countries.

Perhaps the outstanding opportunity in livestock at the present moment is in the market for pork and bacon. The demand for bacon in Great Britain has grown at an amazing rate. In 1921, imports of bacon into Great Britain amounted to 636 million pounds. In each of the last three years the total imports into that market have been more than 900 million pounds. This is an increase of 50 per cent., and most of the additional supplies have come from Denmark. Canadian shipments, however, are no greater today than they were forty years ago.

In 1924, the average price of Canadian bacon on the British market was equivalent to the price which prevailed in September 1930, in that market. In 1924, Canadian exports amounted to 120 million pounds. For the present year it is doubtful whether they will amount to as much as 20 million pounds. In 1924, the price of wheat was approximately 75 per cent. higher than at present, and the price of barley, the most important grain for the bacon hog, was more than two and one-half times the price now prevailing. These facts seem to indicate that the possible margin of profit in hogs has improved decidedly.

British imports of dairy products have also been maintained, although the proportion secured from Canada is declining. Canadian exports of butter have practically disappeared and shipments of cheese are one-third less than they were five years ago. Canadian cheese long held first place in the British market and as late as 1928 received a substantial premium for its high quality.

The rapid decline in Canada's export trade in animal products has been partly due to the great increase in domestic requirements. This has been very great during the past few years and production has not increased in keeping with the growing demand. Shipments overseas have been drastically cut, and in some instances, such as butter and lamb, large quantities have been shipped into Canada. Butter imports

amounted to nearly 36 million pounds in 1929, and imports of mutton and lamb to over four million pounds. Substantial quantities of beef and pork were also brought in.

Millions of bushels of low-grade wheat and coarse grains are produced in Canada each year. Mill offals, screenings and similar products are available in abundance. Under prevailing conditions, it is more profitable to market these commodities through the medium of livestock and animal products than by selling them as raw materials.

The home market itself offers opportunities for the expansion of Canadian production. The efforts of the British Government through the Imperial Economic Conference and the Empire Marketing Board have created conditions favorable to the extension of Canadian exports in the British markets. The high standard of quality achieved by producers of Canadian bacon and cheese is well known overseas. Farmers and others interested in Canadian livestock might well consider their opportunities for the development of the industry and the extension of both the domestic and export markets for such products. The assurance to importers of adequate and steady supplies with quality and price in keeping with similar products from other countries is necessary if Canada is to regain her former position in the international field. Present conditions seem to be favorable for the expansion of this industry and for greater diversification in Canadian agriculture.

### Making Milk Safe

#### Health Authorities Constantly Urge the Pasteurization Of Milk

Milk and milk products are generally recognized as the most important factors in the food supply of the family, but it is not without its dangers as a carrier of disease germs. It is for this reason that health authorities and experts of the dairy industry constantly urge the pasteurization of milk as the one way by which it can be made absolutely safe. A wealth of material might be written about the value and safeguards of the process. Most of the large dairies serving important centres pasteurize all their milk. From the health standpoint pasteurization is sufficiently important that it should be done at home if a supply from a commercial plant is not available. How this is done is told in the pamphlet "Why Pasteurize Milk" which has just been issued by the Department of Agriculture at Ottawa. Briefly, by the use of a dairy thermometer and a double boiler of suitable capacity milk is held at a temperature of 145 degrees Fahrenheit for a period of thirty minutes, then cooled quickly to below 50 degrees Fahrenheit. When thus treated milk is safe.

### Germany Has Big Libraries

#### Berlin Leads Cities With Over Nine Million Volumes

Statistics have just been published regarding the number of books in Germany's libraries. According to these the total number is 54,000,000 volumes, Berlin leading with 9,360,000 and Munich following with 4,260,000. In consequence of the regulation that one copy of every new copyrighted work must be sent to the "Deutsche Bucherei" at Leipzig, that city now contains 3,130,000 books, and four other German cities possess libraries that have over a million.

## PROGRESS OF WATER POWER INSTALLATION

In taking stock of Canada's position during the present period of world-wide economic difficulty, one of the most inspiring features is the fact that the Dominion's water-power resources furnish a seemingly irrepressible impetus to national progress. In the face of all the buffets development has maintained a sureness of advance through all obstacles—through the pre-war slump, through the disruption of the war itself, and through the drastic ups and downs of the last decade. And today, in the midst of world-wide depression, there is being carried forward the greatest

### STEPPING UP CANADA'S WATER POWER DEVELOPMENT

of business cycles, water-power development continues to forge rapidly ahead.

Since 1910 Canada's water-power installation has risen from less than 1,000,000 to nearly 6,000,000 horsepower. The record of growth has been a marvel of persistency. During the past twenty years, water-power

program of hydro-electric installation in the history of the Dominion.

This ability of water-power development to hold its forward course in the face of recession in almost every other major field is one of the most fortunate and favourable factors affecting Canada's economic position and progress.

## Take Long Walks Fat Men are Told

How can you walk off your fat if you haven't any energy to do it? You can take off fat with Kruschen Salts if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet and exercise regularly.

There are six different salts in Kruschen that your body organs must have if you are to enjoy good health. While you are losing fat you will be gaining in vigor, energy, vitality and power of endurance.

That means that soon you will be able to walk many miles without fatigue and enjoy every step you walk.

Drug Stores all over Canada sell Kruschen Salts, and a jar costs but 75 cents—it's a real blessing to fat people.

## WORLD HAPPENINGS BRIEFLY TOLD

Francis Watts, the authority on tropical agriculture, died recently at Port of Spain, Trinidad, aged 71.

The port of Vancouver, I believe, is destined to become the greatest in the world," said the Minister of Marine, Hon. Alfred Durnanleau, in an address at Vancouver.

Dr. Charles F. Colter, D.D.S., who was largely instrumental in forming the Canadian Army Dental Corps early in the war, died in Toronto, in his 64th year.

When the Prince of Wales visits South America next year to open the British Trade Exhibition at Buenos Aires, he plans some extensive sight-seeing.

There were no legal barriers to the building in London, England, of a hotel by the C.P.R., despite a rumor from London to the contrary, company officials stated.

Another great European war in 1932, resulting in the annihilation of Germany, is predicted by General Ludendorff in a pamphlet just published.

The trade delegation of the Canadian Chambers of Commerce was entertained in Shanghai at luncheon by the Pan-Pacific Association before sailing for Hong Kong.

## Picture of Health Now

"In May and June I was badly run down and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Punichy, Saskatchewan.

## Would Be Safe

Rudiments Of Flying Taught In London, England, From Table-Top

A table-top teacher for the rudiments of flying is being used in London, England, to teach student fliers, don, England, to teach student fliers. The "pilot" is provided with a real joy-stick, a rudder bar and throttle, fitted under the table at which he sits. On the table at his eye level is a large model airplane and the rear end of the case is open so that the pilot will feel a wind up to 70 miles an hour. All movements of the controls at the desk are recorded by the enclosed plane.

## Encourage Seed Cleaning

Saskatchewan Municipalities Take Advantage Of Government Assistance

Six Saskatchewan rural municipalities were provided with combination seed cleaning outfits, under arrangement with the Provincial and Federal Governments during this, the first year of operation of the scheme, according to Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan. Under the plan the cost of the machines is shared by the two governments; the municipalities supplying the engine, the housing and transportation equipment.

## A Mother's Anxiety

About Her Delicate Daughter

"She seems to be fading away," said an anxious mother recently about her daughter. Thousands of mothers could say the same thing. Their daughters endure a trying life robbed of all vitality and brightness. Their cheeks are pale; their eyes dull; their step languid and every movement tells of shattered health. If neglected their suffering grows more acute till decline sets in.

If your daughter complains of weariness; pains in the side; weakness; headache or backache; her appetite is uncertain and her spirits low—anaemia is the cause. She needs new blood. Give her Dr. Williams' Pink Pills at once for these pills actually renew and enrich the blood. They make sickly girls well and happy; improve the appetite and bring back all the charm and brightness of perfect health.

Dr. Williams' Pink Pills are sold by all dealers in medicine or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

## May Not Be Practical

Value Of Reading Machine Yet To Be Proved

A new invention from Berlin is a "reading machine" which will project printed pages upon a screen, enabling either a family or an entire audience to read together. The projector greatly enlarges the picture, permitting several pages of normal size reading to be reproduced from a film the size of a postal card. Whether this invention will be of any practical value remains to be demonstrated. The inventor declares it will revolutionize the publishing of books, since one of these small films can take the place of several books.

Persian Balm is unrivalled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawlessly white. Especially recommended to soothe and relieve roughness or chafing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet requisite for the woman who cares for charm and elegance.

It was once supposed that the northern lights of Arctic regions could be smelled as well as seen.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

## Milk Pool To Expand

The Saskatoon Milk Pool, whose corporate name is "The Saskatoon Dairy Co-Operative Marketing Association Limited," has decided to expand and go into the dairy business. It is now proceeding to get into touch with those eligible for membership.

Minard's Liniment refreshes the scalp.

## Maybe... you've never thought of this

Next time you want soft water in a hurry try Gillett's Lye. Dissolve one tablespoonful in a gallon of cold water\* and use this solution for cleaning sinks, refrigerators, floors, tiling, etc.

For washing dishes, dissolve one tablespoonful of Gillett's Lye in one quart of cold water. Keep in a labelled bottle and put a few drops in the dishpan whenever you wash up.

\*Lye should never be dissolved in hot water.

## C.P.R. Hotel For London

Arrangements Have Been Made For Securing Suitable Site

Announcement was made by E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, of the acquisition of a site for the hotel proposed to be erected by the company in London, England. Mr. Beatty's statement follows:

"After protracted negotiations, the company has succeeded in securing a hotel site in London, facing Berkeley Square and Bruton Street. The block is a substantial one, containing approximately 77,000 square feet in area. Negotiations for its acquisition are just about completed, and when possession is secured, which will not, however, be for some months yet, the work of construction will commence. In the interim, the company's engineers and architects will proceed with the preparation of preliminary plans. The hotel, when completed, will contain a minimum of six to seven hundred rooms."

## DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The safe and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

## Winter Service Arranged

Mail Will Be Carried Into North By Air More Frequently

Arrangements for an air mail service into the Mackenzie River district through the winter of 1930-31 have been made by the Post Office Department, according to an announcement in the November supplement to the Canada Official Postal Guide.

The air mail service will supercede all previous mail services to this area and will effect more frequent and speedy communication than has been possible in the past. The frequency of delivery will be increased to more than double, and the time will be reduced to less than half.

The mail service between Herschel Island, Y.T., and Aklavik, N.W.T., will be performed by police patrol. Rae will be served irregularly by police patrol from Fort Resolution.

## SUNDAY SCHOOL LESSON NOVEMBER 30

ZACCHAEUS THE PUBLICAN — A BUSINESS MAN CONVERTED

Golden Text: "The Son of Man came to seek and to save that which was lost."—Luke 19:10.

Lesson: Luke 19:1-10.

Devotional Reading: Psalm 15.

## Explanations and Comments

The Resourceful Onlooker, verses 1-4.—When Jesus was passing through Jericho, a great crowd assembled to see Him. The rich Commissioner of Taxes, or chief publican, Zacchaeus by name, being short of stature, realized that he would be unable to see Jesus. And no doubt the hostile crowd elbowed off the hated tax collector. He was, however, a determined and resourceful man, and ran on ahead of the crowd and climbed up into a sycamore tree by the side of the road by which Jesus would pass.

"Zacchaeus ran before, we are told. Sometimes a man reveals the secret of his strength in some apparently insignificant deed. The forcefulness of the will of Zacchaeus lies not especially in the fact that he climbed the tree, but in the fact that he ran before. He anticipated Jesus. He saw which way Jesus was to pass, and made preparations for the best view.

The Self-Invited Guest, verses 5-7.—When Jesus reached the sycamore tree He looked up and saw Zacchaeus, and at once called him by name, and said unto him "Make haste, and come down; for today I must abide at thy house." His "must" was that of a shepherd who would care for a lost sheep. When Zacchaeus dropped down from the branches with great joy and hastened homeward with Jesus, the people began to murmur saying, "He is gone in to lodge with a man that is a sinner."

The Conversion of a Business Man, verses 8-10.—"Think of Zacchaeus on the morning of that day! He was the chief among the publicans and he was rich. Full of guilty gains and entirely impenitent. In the far North the quicksilver freezes in the thermometer, which of course ceases to register, and the instrument is useless; but let the temperature rise, and the quicksilver becomes at once nimble and useful. That morning in Zacchaeus the moral quicksilver was frozen, and most likely it had been for years; he, however, no sooner stood in the white, fierce light of embodied righteousness than the quicksilver thawed, conscience acted, and the publican was convicted" (W. L. Watkinson). Not a word had been said about his speculations; yet in the presence of the righteous Lord he voluntarily and promptly made a clean breast of it.

"Ere God forgive the guilt  
Make man some restitution."  
—Browning.

Zacchaeus used the present tense as a vivid way of asserting his future course of action: "Behold, Lord," he said, "the half of my goods I give to the poor; and if I have wrongfully exacted aught of any man, I restore fourfold."

For treatment of caked bags in cows, or garget, use Douglas' Egyptian Liniment—the quick, sure remedy. Saves time and expense. Prevents blemished stock.

## Will Build Produce Market

Twenty market gardeners in the Winnipeg region are planning the construction of an all-year produce market in Winnipeg, to be conducted by the growers, each of whom will occupy a stall. The cost of the building will run to about \$35,000.

CASTORIA**

## A NEW FARM POLICY PROPOSED BY GOVERNMENT

Toronto, Ont.—A Dominion agricultural policy is proclaimed by Hon. Robert Weir, Dominion Minister of Agriculture. On the occasion of the opening of the Royal Winter Fair, the minister enunciated important policies, adopted after three days' deliberation of the provincial ministers of agriculture and to be known as the "national agricultural policy."

Declaring that at the present period of depression new and drastic steps in the right direction should be taken, and insisting on the necessity of co-operation throughout agricultural Canada, the minister introduced four measures designed to remedy the situation and bolster "Canada's chief industry." They are:

1. The introduction of better blood in herds.
2. The scientific use of home grown products for herd feeding purposes.
3. Careful study of the science of marketing.
4. The prevention of implantation and spread of poultry diseases.

One of his ambitions and reiterated policies, said Mr. Weir, was to find some machinery by which every farmer throughout the country could be made aware of the changes in agricultural methods and of the improvement in farming conditions. This he had discovered, he said, as the result of the conference with provincial agricultural leaders.

"It has been agreed that the provincial departments of agriculture and all the machinery at their service, will transmit and interpret to the farmers of Canada every possible advance or policy which the Dominion Department of Agriculture, after consideration and consultation, will consider beneficial to the farming population as a whole. This, of course, with the least possible delay and at the lowest cost."

Decrease in the cost of production and scientific production—that is the production of market requirements—were two fundamental principles that had not been lost sight of.

The minister made a brief analysis of his four major propositions. Considering the difficulty the average farmer experiences in procuring a first class sire, whereby he might improve the blood of his cattle and the general usefulness of his stock. Mr. Weir undertook to supply free of cost to any group of energetic and deserving farmers a sire to be used during a period of two years. This, he thought, would eliminate expense, and a useless waste of time and energy and encourage one of the more necessary and wholesome steps in the raising of profitable and sound stock.

Because of present conditions, the minister foresaw a very definite increase in pork production during the next few years. This he did not advise, but felt that because of the inevitable trend, steps should be taken to direct that increased production. In his opinion this would be best done by supplying farmers with breed sows of the fine bacon type at cost and at half transportation price. This would eventually mean that the right quality of bacon could be procured for home consumption and exportation with substantial remuneration for the farmer.

### Advocates Free Port

Portage la Prairie, Man.—Proposal that Churchill, the West's sea harbor on Hudson Bay, be declared a free port of entry for British goods, was made by Hon. R. A. Hoey, acting premier of Manitoba, at the annual convention of the United Farmers of Manitoba. He considered that such a move would tend measurably towards the establishment of the West's agriculture on a permanently profitable basis.

### May Withdraw From League

Santiago.—Chilean government is considering withdrawal from the League of Nations, believing itself to have been slighted by the larger European members. Rejection of Chilean candidate for seat on the world court bench is one cause for forthcoming withdrawal, it is said.

W. N. U. 1865

## To Stabilize Wheat Prices

### Advocate Measure To Restore Confidence and Ameliorate Western Conditions

Portage la Prairie, Man.—Organized agriculture of the prairies stands four square back of the premiers' pilgrimage to the east to seek Dominion government aid for the west. In annual convention here, United Farmers of Manitoba gave their endorsement to the premiers' mission to gain Dominion assistance in restoring confidence and in ameliorating conditions in the west.

Already United Farmers of Alberta and United Farmers of Canada, Saskatchewan section, have taken a stand in favor of fixed prices for wheat by means of Dominion intervention, admittedly the object of the prairie premiers' journey to Ottawa. The Manitoba body, however, erased all mention of price fixing from the resolution which it approved unanimously.

Though Manitoba farmers adopted no policy on "pegged" wheat prices, as advocated by George H. Williams, president of the Saskatchewan body, they decided to send a representative to the interprovincial conference in Saskatoon. At this meeting, the matter of stabilized grain prices by government intervention will be considered.

The Manitoba delegation will be bound to no specific move with regard to steps to be taken at the meeting.

In the course of open debate on the question, Mr. Williams stated that United Farmers of Ontario and the Canadian Council of Agriculture would be represented at the meeting, as well as prairie farm body delegates. The Manitoba convention approved the action of its directors in deciding to send a delegation to the Saskatoon parley, scheduled November 26 to 28.

## Exhibit Of Choicest Products

### Varied Display Seen At Royal Winter Fair In Toronto

Toronto, Ont.—The choicest of Canada's agricultural products and the bluebloods of her cattle, domestic animals and poultry were on display here, when, without any ceremony or speech-making, the gates of the Royal Winter Fair were opened to the public. Housed in the buildings at the Canadian National Exhibition Grounds were hundreds of horses, livestock, poultry, foxes, and cats and dogs, seeking glory in their respective classes, while in other buildings were aisles and aisles of fruit, flowers, dairy products, seed grains—the best Canada and the United States has to offer.

Perhaps the most varied show was the great display of apples, entered for competition by farmers and associations from Prince Edward Island to British Columbia. The displays consist of boxes of apples packed for shipment and placed one box beside the other, 10 crates high and 25 crates wide, forming a great glistening sea of red and green.

The show was officially opened by Sir Robert Borden, when the former premier addressed the throng in the huge Coliseum.

## Decrease In Fall Grain

### Interesting Report Issued By Dominion Bureau Of Statistics

Ottawa, Ont.—The area sown to fall wheat in Canada for the season 1931 as of Oct. 31, 1930, is estimated at 894,000 acres in a report issued by the Dominion Bureau of Statistics. This represents a decrease of 148,000 acres, when compared with the total of 1,042,000 acres sown last year.

The condition of fall wheat on October 31, is reported as 96 per cent. of the ten-year average, against 88 per cent. on the same date in 1929.

The report also deals with fall rye, showing that 944,000 acres have been sown to this grain. A decrease of 19 per cent. from the total of 1,116,000 acres sown in 1929. The condition of fall rye was reported on October 31, as 93 per cent. of the ten-year average. The condition on the same date last year, was 90 per cent.

### Soviets Establish Child Clinics

Moscow, Russia.—Special clinics for crippled children are being established by the Soviet Union. The health department estimates from incomplete data that there are 750,000 crippled children in the nation.

## ATTENDS V.C. DINNER

Col. C. W. Peck of Prince Rupert, B.C., only member of parliament to hold the Victoria Cross, who was one of the many holders of this medal to attend the V.C. dinner held November 8, in Toronto, Ont.

## Wheat Acreage Should Not Be Reduced

### Would Be Economic Fallacy In Opinion Of H. S. Fry

Toronto, Ont.—Reduction of acreage seeded to wheat by farmers of western Canada, in an effort to cut down production and thus limit the exportable surplus of stocks, would be an economic fallacy, in the opinion of Harold S. Fry, of Regina, chairman of the general publicity committee of the World's Grain Exhibition and Conference, which will be held in Saskatchewan's capital in 1932. Mr. Fry is also publicity director of the Saskatchewan Wheat Pool.

According to Mr. Fry, Canada produces in largest quantities the world's best hard spring wheat and ranks as the world's greatest exporter of wheat. He held it paramount that Canada maintain this supremacy. Either by finding new markets for wheat, lessening the cost of production, finding new uses for wheat—or a combination of all three.

### Premiers Visit Edinburgh

Edinburgh, Scotland.—Three Empire prime ministers: Rt. Hon. R. B. Bennett, of Canada; Rt. Hon. James Scullin, of Australia, and Rt. Hon. G. S. Forbes, of New Zealand, spent a day in Edinburgh. After a visit to the Scottish National War Memorial in Edinburgh Castle, where each laid wreaths, they received the freedom of the city at Usher Hall.

### West Is Optimistic

Ottawa, Ont.—Returning from a trip to the Pacific coast, Hon. Alfred Durand, Minister of Marine, expressed sentiments of great confidence in the future of the west, particularly of British Columbia. The west was optimistic despite the present depression, he said.

## No Interference

### Sir Henry Thornton Says C.N.R. Has No Complaint Regarding Treatment By Present Government

Ottawa, Ont.—Interviewed here Sir Henry Thornton, chairman and president of the Canadian National Railways, said:

"I have no particular comment to make upon recent rumors and reports relating to the Canadian National Railways other than to say that the administration has not the slightest complaint regarding its treatment by the present government and has no apprehensions with respect to the future. We have good steady jobs minding our own business and trying to operate the railway. There does not seem to be any immediate reason for undue excitement."

Sir Henry spent some time in conference with Hon. Dr. R. J. Manion, Minister of Railways, who returned this week after a tour of the Maritimes. Only routine matters were under discussion, it was stated afterwards.

## Rapid Telegraphy

### Telegraph Transmission At A Speed Of 9,120 Words A Minute

London, Ont.—Addressing the London branch of the Engineering Institute of Canada here, R. B. Steele, assistant chief engineer of the Canadian National Telegraphs, announced telegraph transmission at the speed of 9,120 words a minute would be made possible shortly by further extension of the carrier current system.

In 1927, Mr. Steele said, the C.N. Telegraph increased by means of carrier current the capacity of a pair of wires from 400 words a minute to 4,120 words a minute for a single pair of wires. Further development of the system now made possible the transmission of 9,120 words a minute for a single pair of wires.

### Would Conscript High Incomes

Vancouver, B.C.—Conscription of all incomes in excess of \$50,000 a year, as a solution for the nation's unemployment problem was urged by delegates to the regular meeting of the Vancouver, New Westminster and districts Trades and Labor Council, in a resolution addressed to the Federal and Provincial Governments.

### Money To Be Returned

Rio De Janeiro.—Provisional President Getulio Vargas signed a decree returning to the Bank of London of South America, Limited, and other banks, approximately \$500,000 requisitioned during the recent revolution.

### Mexico In Market For Wheat

Chicago.—Reports were received at the Chicago Board of Trade from Mexico City to the effect that the Mexican Government had arranged for the purchase of 200,000 bushels of Canadian wheat from the Canadian pool.

## ROYALTY OF SPAIN

Photograph above shows Queen of Spain and her two daughters, Infantas Beatrice and Maria Christiana, leaving Westminster Palace, London, England, upon her 43rd birthday.

## MORE FUNDS ARE SET ASIDE FOR RELIEF PURPOSES

Ottawa, Ont.—A new list of expenditures approved by Hon. Gideon Robertson, Minister of Labor, brings the amounts of joint total expenditures of Dominion, provincial and municipal governments, for unemployment relief and relief works, up to \$45,660,705. Additional sums approved for Nova Scotia and Manitoba augmented the previous total by \$1,038,755.43, of which the eastern province's share is \$916,205.43, and that of Manitoba \$122,550.

The grand total is now distributed as follows: Nova Scotia, \$1,025,305; Prince Edward Island, \$144,000; New Brunswick, \$406,300; Quebec, \$3,501,800; Ontario, \$10,735,103; Manitoba, \$593,740; Saskatchewan, \$1,476,941; Alberta, \$2,667,536; British Columbia, \$1,325,482; Yukon, \$5,000; Canadian Pacific Railway, \$11,514,000; Canadian National Railway, \$11,765,498; grade crossing fund, \$50,000.

The program of construction which will be engaged in by the Canadian National Railways, under the arrangement whereby interest on necessary borrowings is paid by the government, was announced here recently. The arrangement is made so as to speed up construction, etc., in order to give employment as soon as possible. The total estimated amount for the various projects, according to the program, is \$9,048,653, of which \$6,654,748 constitutes the proportion to be paid by the railway. The remaining sum will be met out of the grade crossing fund and other sources. The amount of contributions to be determined by the Board of Railway Commissioners.

In addition to the total sum mentioned there is a further amount of \$5,110,750 for rails and ties.

This list of works includes: Freight storage shed, Fort William, Ont., total cost \$132,000; railway proportion, \$132,000.

Subway, Saskatoon, total cost \$300,000; railway proportion, \$40,000. Diversion railway line, Westfort, Ont., total cost \$550,000; railway proportion, \$550,000.

Relay 160 miles main line with new heavier rails at a total cost of \$1,103,054, to be borne by the railway.

Lay track on approximately 143 miles new branch lines, total cost to the railway, \$1,540,000.

## Independence For India

### Voice Of Islam Heard At Round Table Conference In London

London, England.—India's round-table conference heard a voice from Islam in a demand for complete independence.

"I do not come to ask for Dominion status," exclaimed Muhammed Ali, one of the famous Ali brothers and a leader of the all-India Moslem League. "I do not believe in the attainment of Dominion status. The one thing to which I am committed is complete independence."

The Hindus and the Moslems alike challenged the Conservative view, expressed by Lord Peel, when the former secretary of state for India declared Dominion status had not been promised as an immediate gift, but had merely been pointed as a goal by the present Viceroy of India, Lord Irwin.

"I want to go back to my own country," Muhammed Ali declared, "only if I can go back with the substance of freedom in my hand. Otherwise I will not go back to the slave country. You will have to give me a grave here."

"We will be satisfied with nothing less than full responsible government," insisted Dr. B. S. Moonje, head of the Hindu Mahasabha, or protection society.

### Heavier Imports Of Salmon

London, England.—Imports of canned salmon from Canada during the first ten months of the year were higher than in 1929, while salmon imports from Russia declined heavily in the same period, Rt. Hon. William Graham, president of the Board of Trade, told the House of Commons.

England's census will be taken on Sunday, April 26, 1931.

### A SUGGESTED CURE FOR CANADA'S BUSINESS DEPRESSION

The financial condition of Canada,  
that is the Canadian farmer and wage  
earner, is in a worse state of affairs  
than it has ever been. This is due to  
the low wheat price, which has reduced  
the buying power of the people of the  
West and consequently it has affected

the East, where most of our manufact-  
uring is done. If the price of wheat  
could be stabilized this condition would  
right itself immediately. But that "if"  
always seems to stand in the way of  
anything worth while.

It has been stated that unless this  
world-wide business depression is not  
soon halted, that it will lead to another  
war. This is mere guess work of course,  
but when one takes into consideration  
the great unemployment in the world  
and the fact that our farmers are in  
desperate need of relief, this is not  
out of the way. There are farmers of  
Western Canada who are not living,  
but merely existing, and they will do  
anything, even probably to taking up  
arms, if it would be a solution towards  
bringing the world back to normalcy.  
But why should we have a war for  
this reason? If there was a war  
Canada would find enough surplus  
cash to maintain an army. There is  
just as much surplus cash in Canada  
today as there was during the years  
1914-18 and at that time Canada raised  
enough money to maintain her army.  
But the surplus cash is held by a few  
and they are only looking after their  
own interests when they do not invest  
it in anything at the present time.  
Good reliable investments are hard to  
find.

During the Great War, as mentioned,  
Canada raised millions of dollars by  
the Victory Loan method. A good rate  
of interest was paid and the people  
invested their money because it would  
be safe. Safe for the very reason that  
it was backed by the Dominion of Ca-  
nada.

It has been suggested that if every

person in Canada and the United States  
would buy so many bushels of  
wheat, say 15, and took this off the  
market, that there would be no sur-  
plus wheat and thus the price would  
rise on account of the demand. Did  
you ever consider this? And would it  
not be so? The only thing is that the  
wheat would have to be taken off the  
market by the purchaser. Now who  
would be willing to put their surplus  
money into wheat at this time, when  
money is scarce. There would have to  
be some inducement to the public in  
order to get the people to place their  
money in this commodity. The rail-  
ways of the country recently received  
an inducement to expend a few mil-  
lions of dollars now and help out the  
unemployment, and this same method  
could well be adopted by the Govern-  
ment to cure the wheat situation. It  
could borrow money from the people  
of Canada, and the world in general if  
necessary, on the same principle as  
it did during the war, viz. the Victory  
Loan, and this money, backed by the  
Government of Canada at five per cent  
interest would be an attractive in-  
vestment. The government in turn  
could re-invest this money in "Canadi-  
an" wheat at a fair price, and take  
the purchased wheat off the market  
for the time being. At the same time  
the farmer would be able to sell his  
wheat at a fair price; in turn he would  
be able to buy the food and clothing  
he needs. If he did this the manufac-  
turing industries would benefit by the  
increased buying power of the West,  
and with increased manufacturing  
would come the increase of employees.  
A great many of the unemployed would  
have work and the cycle would be  
complete. The world wheat surplus  
would be no more and the Canadian  
Government would be able to unload  
enough wheat each year, at a better  
price possibly than she paid for it, to  
pay the interest on the bonds and re-  
deem a certain per cent of the principal  
each year.

Remember! When the next print-  
ing salesman walks into your office  
and asks you for a printing order, tell  
him that there is a printer in town and  
that he CAN do that particular job.

## ENO'S "FRUIT SALT"

### Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean ill health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

ENO'S "Fruit Salt" in a glass of water, every morning is the safest, surest and most pleasant way to inner cleanliness and perfect health.

### CHAPTER V.—Continued.

"He moved on slowly, reaching Nick's gate and looking up at a doorway beautiful despite its peeling paint. There was no sign of Gay. In Bakersville most men come home at noon, and at eleven-thirty their wives are in the kitchen. With the unerring instinct of one born and raised in the community, John Maxwell made his way toward the side door.

He saw then, that Gay was in the orchard, hanging some diminutive pink garments on the line. Her task done she glanced across into her neighbor's garden, where, still clad in crisp blue linen, Mrs. Halliday was superintending the setting-out of plants. Glancing up, she caught Gay's eye, and bowed. There was nothing friendly in the act—nothing akin to the greeting she had tossed across the square to Nick, a few hours earlier. John Maxwell's grey eyes hardened. Then, as Gay caught sight of him, he smiled.

"Mr. Maxwell! What brings you out this morning?"

"Only the spring. Couldn't seem to settle down to work, and Nick gave me leave to take a holiday."

Gay laughed and said: "Will you stay to dinner with us?"

"Not today. Guess you have enough to do, cooking for your own three boys. Nick's still a boy to me, you know, if he has been married long enough to acquire a family. Do you like your new neighbors, Gay?"

They had reached the porch, and the girl sank down wearily, glancing at the pocket of her dress, which

was held at one corner by a safety pin.

"I hope you don't think I use pins instead of needles for my mending!" Her glance strayed to the trim blue figure across the hedge, and her color rose. "It's Sonny does it. He can just reach my pockets and he will pull at them. Sometimes he tears them when I can't stop to mend."

She was silent for a minute before she said, in answer to his question: "You asked about the Hallidays? I hardly know them. Nick called one night when I was laid up with a headache. He says they're very pleasant. She's an artist, and they're fixing the house beautifully. It makes me crazy to fix ours; but everything takes so much money. There's Sonny calling. He's just waked up, but baby's sleeping. Do wait and see him, Mr. Maxwell."

"Yes, I'll wait. I want to poke 'round your pansy bed. Most all ours got winter-killed this year."

But when Gay had gone John Maxwell didn't move toward the pansies. He sat on the steps, watching the blue-clad figure opposite. The flush that had mounted to Gay's cheeks as she glanced at her new neighbor, had not escaped him; nor had the tired lines beneath her eyes.

He wondered if it were only the children who had caused Gay's lack of sleep. Was it possible that Nick, the steadiest fellow in the whole world, was making a fool of himself over another woman? Stranger things happened every day, and Nick was only a boy—a boy who had never quite had his fling.

John Maxwell understood. He himself, had married at twenty-one. He remembered a time some four years later, after the advent of the second baby, when life had seemed a good deal of a treadmill. But there had always been Mary. Never for a moment had he looked at anybody else. Surely Nick—

"Here's my big boy, Mr. Maxwell." Gay stood in the doorway, Sonny, fresh and sweet in a pink romper, in

her arms. For a moment the tired lines had left her eyes, and only the pride of motherhood was there. John Maxwell, many times a grandfather, thought he had never seen a sweeter picture. He stretched out his arms, and with a delighted cry the boy went to him.

"He wouldn't do that with every-one," said Gay. "He's rather shy."

"I think he remembers my last visit, as well as my watch charm that always fascinates the youngsters."

The caller had seated himself upon the steps again, and given the boy his watch. Sonny stared at it a moment soberly, then held it to his ear in a way that made them laugh.

"He looks more like his daddy than he did, Gay."

"I've noticed that. I love a boy to look like his father. It's strange, Mr. Maxwell, but Nick wanted a little girl. I thought a man always wanted a son; and Nick's such a man's man, too. But I honestly think he was disappointed, especially when the second baby wasn't a 'little sister'; though he wouldn't change either of them now," she added, smiling.

"Daddy?" asked the child, looking up questioningly at his mother.

"Nearly time for him," Gay answered, and smiled tenderly. "Daddy's the first word he said, Mr. Maxwell. I remember feeling the least bit hurt! And Nick's such a wonderful playmate that he adores him. I—"

She stopped because the boy had uttered a delighted squeal. He wiggled away from John Maxwell's knee, while the watch, forgotten, hung limply by its chain. Nick was coming! With swift, unsteady feet the child ran to him; and with a sense of genuine relief the president of the First National Bank saw that his paying teller had no eyes for the lady across the hedge. He stooped with outstretched arms, and lifting his small son high, kissed the top of his bright head—hugged him a moment rapturously, and settled him on his shoulder as he came forward.

"A pretty sight, that," said John Maxwell softly.

But Gay did not speak. She had arisen, and was watching her husband with an intensity not quite natural in a wife of four years standing. The blue figure in the adjoining garden was also watching; though Nick was serenely unconscious of an audience. He came nearer, grinned, and said: "So this is how you take a holiday, Mr. Maxwell—calling on my wife? Mind if I kiss her? It's a sort of habit I've acquired."

"A good habit," said John Maxwell quietly. "Don't stop for me!" and the fact did not escape him that as Nick obeyed, Mrs. Halliday, shrugging as if disgusted at this display of family affection, turned away.

"Damn her!" said John Maxwell below his breath.

He said it again when he was in his private sanctum at the bank that afternoon. Nick had insisted that he stay to dinner, and as they started back to work, Mrs. Halliday appeared on her front porch. She didn't speak, but her smile was so intriguing that Nick stopped; exchanged a few words about the garden; presented Mr. Maxwell as his "chief," and, at a subtly expressed hint from the lady, promised to step over after supper and survey her peony plants.

"I've been hard at work in the garden all the morning," she apologized prettily, with a glance at her spotless linen gown. "If you'll forgive my appearance now, I'll promise to look less disreputable this evening."

"You look," Nick instantly replied, "like a part of the garden itself," which bit of gallantry brought a sudden, satisfied light to the woman's eyes.

The walk to the bank was, on the whole, silent. It was as they turned into Main Street that Nick said, as if it were something he'd been considering: "Queer, isn't it, how some women can work in a garden, or 'round a house, and look so confoundingly neat? Now Gay—"

John Maxwell snorted angrily. "Neat! My dear boy, that woman never set out a plant in her whole life! She stands about looking pretty, and ordering some man to do the dirty work. Take care, Nick, that she doesn't take to ordering you!"

Nick stared at the frowning visage of his old friend; then laughed and said: "To do her dirty work?"

"There are all kinds of dirty work, my boy," answered John Maxwell, so soberly that Nick exclaimed: "Good thunder! Mr. Maxwell, you don't think—"

"I don't think anything," broke in the older man hastily, already fearing that his indiscretion might put ideas into Nick's head. "I don't think anything except that you'd better take care of Gay. She's got hollows in her cheeks."

They had reached the bank, and without another word its president marched into his private room and slammed the door.

"Damn her!" he said for the second time that day.

Yet, when he cooled off and thought it over, he realized that he had no grounds whatever for his suspicions. As he had said to Gay, Nick was still a boy, though he had shouldered a man's responsibilities. Why shouldn't he enjoy talking with a pretty woman? John Maxwell smiled at the thought that he, himself, was not averse to doing so! Should he blame Nick because Gay seemed tired and listless? Most young mothers were, being unused to broken sleep and sudden loss of freedom. He remembered when Mary had looked like that—and his two daughters as well. (To Be Continued)

### Little Helps For This Week

"Whatsoever a man soweth, that shall he also reap."—Galatians vi. 7.

God will not seek thy race,  
Nor will He ask thy birth;  
Alone He will demand of thee,  
What hast thou done on earth?  
—Persian.

And they who sowed the light, shall reap  
The golden sheaves of morning.  
—James Russell Lowell.

The present life is the seed-plot of the future state, and the harvest which we reap in eternity is the same in character and quality as that which now we sow. Every thought we think, every word we speak, every action we perform, every opportunity of service neglected or improved, is a seed sown by us, the fruit of which shall multiply either untold miseries or myriad blessings in the eternity into which we go.

—William M. Taylor.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Exterminator will relieve them and restore health.

If everyone ate his food uncooked, says a European scientist, the normal span of life would be 140 years instead of 70.

Use Minard's Liniment for Toothache.

Dice used by Egyptians in Queen Cleopatra's time are exhibited at the Field Museum in Chicago.

## TOO MUCH ACID

may be causing those  
frequent headaches

WHEN there's too much acid in your stomach, you must force yourself to work, and even pleasures are too great an effort. Appetite lags; the digestion is poor; the whole system suffers.

Laboratory tests show an acid condition is due to errors in our modern diet. But you need not wait to diet your way out of the trouble! Take a tablespoonful of Phillips' Milk of Magnesia.

This will neutralize the excess acid instantly; make you feel like a new person in just a few moments.

Take a little whenever heartburn, sick headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too

acid. Whenever you are taking cold or feel sluggish, weak, constipated. Phillips' Milk of Magnesia has a gentle laxative action.

Delightful to take. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. It always bears the name Phillips' for your protection.

## A Mid-Atlantic Hello

"Hello Mother. We're having a wonderful voyage, left Southampton day before yesterday and arrive Quebec day after tomorrow." The young man whose phantom outline shows in the picture of one of the deluxe apartments of the new Canadian Pacific liner Empress of Britain will be able, when the 42,500 ton ship enters service between Quebec and Southampton next June, to talk to anyone in Europe or the Americas for the first time in Canada's maritime history.

Above, a recent photograph shows the new liner nearing completion on the Clyde, and the telephone installation that will be a feature of every first

class bedroom or apartment. Direct connection through the ship's switchboard with any land telephone will make calling Vancouver or Glasgow from mid-Atlantic just a matter of lifting the receiver and asking for the number. The Canadian Pacific announces that the wireless telephone will be so powerful that continuous touch will be maintained with both sides of the Atlantic.

The magnificent new Empress of Britain, 760 feet long, 97½ feet wide and with a speed of 24 knots, will bring Cherbourg, Southampton and Quebec more than a day closer.
